Experience

Savannah River National Lab

Columbia, SC

Project Manager Intern

Aug 2025 – Present

- Designed a real-time cyber awareness dashboard integrating PLC data for continuous monitoring.
- Created data visualizations and developed dashboards to track anomalies and assess system health.
- Defined project scope, milestones, and deliverables, ensuring alignment with stakeholder requirements and timelines.

Division of Business Affairs and Administration (USC)

Columbia, SC

IT Intern

May 2025 – Aug 2025

- Managed USC's central student database, ensuring accuracy and data privacy compliance.
- Delivered responsive customer-facing IT support for students, faculty, and staff.
- Configured enterprise hardware supporting mobile credential implementation.

Mathematical Foundation of Data Science - REU

Columbia, SC

UG Researcher

May 2025 – Aug 2025

- Leading an NSF-funded research project focused on extending Google's SayCan framework to translate natural language instructions into robotic actions.
- Contributing to technical implementation by integrating ROS with large language models (LLMs) and enabling distributed inference for scalable, low-latency performance.

Artificial Intelligence Institute of USC

Columbia, SC

Undergraduate Research Assistant

Jan 2023 – Present

- Designed analytics pipelines for AI-generated content detection, reducing digital spam.
- Conducted statistical analysis/visualizations on large datasets to uncover insights.
- Built UI for generative AI chatbot improving efficiency in smart manufacturing.

Student Success Center USC

Columbia, SC

Peer Consultant

Aug 2024 – May 2025

- Led over 40 one-on-one academic consultations, advising peers on time management, study strategies, and academic planning to improve overall student success.
- Oversaw daily front desk operations, managing 50+ student inquiries per week through cold calls, emails, and walk-ins

Leadership & Involvement

Kappa Theta Pi

Columbia, SC

Co-founder, Director of Finance

May 2025 – Present

- Managing a web development project using Jira for a nonprofit organization, overseeing design, functionality, and alignment with organizational goals.
- Managing finances and budgets using Excel, ensuring accurate expense tracking.

Hack-A-Thon Co-Director, MCEC

Columbia, SC

Co-Director

April 2025 - Present

- Created and spearheading student-corporate engagement pipeline through USC's Hack-A-Thon.
- Directly collaborating with Capgemini and Dominion Energy to design hackathon challenges for students and offer jobs for winning teams.

Women in Computing Club

Columbia, SC

Vice President

May 2023 – Present

- Directed corporate outreach, securing sponsorships and recruitment partnerships.
- Planned events and networking sessions with industry partners for 50+ members.

Publications
