

EDUCATION

The University of South Carolina | Columbia, SC

B.S. in Computer Science, Minor in Business Administration | GPA: 3.75/4.0

May 2027

PROFESSIONAL EXPERIENCE

- Product, Technology Intern | LPL Financial | Fort Mill, SC

May - August 2026

 - Incoming Summer 2026
- Data Analyst | BlueCross BlueShield of South Carolina | Columbia, SC

July - Dec 2025

 - Addressed limited visibility into financial and operational performance by developing Power BI dashboards and SQL-based reporting solutions, enabling 40+ internal clients to make more informed budget planning decisions.
 - Solved challenges in tracking large-scale project funding by designing Excel forecasting models for 700+ initiatives, improving allocation accuracy, and helping teams anticipate downstream budget impacts.
- Client Representative Intern | BlueCross BlueShield of South Carolina | Columbia, SC

May - July 2025

 - Improved cross-functional alignment during internal project initiatives by facilitating client budget planning meetings, tracking funding allocations, and streamlining communication between stakeholders.
 - Identified inefficiencies in internal operational workflows by documenting end-to-end processes and proposing automation opportunities, helping improve consistency and reduce organizational bottlenecks.
- Full Stack Engineer | Kappa Theta Pi | Columbia, SC

January - May 2026

 - Developed a full-stack web platform for a local nonprofit using Next.js, React, and TypeScript, creating a centralized digital presence that improved outreach, donations, and access to support resources for community members.
 - Enhanced platform accessibility and user safety by implementing a privacy-focused Safe Exit feature, integrating a real-time weighted search system across 20+ pages, and connecting a Sanity headless CMS to enable non-technical staff to manage and publish live content independently.
- Teaching Assistant | The University of South Carolina | Columbia, SC

January - May 2026

 - Helped address learning gaps for 40+ students weekly by providing one-on-one and small-group instruction in HTML/CSS, debugging strategies, and foundational programming concepts, improving student technical understanding.

PROJECTS

- CreditHack | [Link](#) | 2nd Place @ Winthrop University Hackathon

March 2026

 - Engineered a fintech platform integrating Plaid to analyze 1,000+ real-time user transactions and evaluate 50+ credit cards through a rewards optimization engine, generating personalized recommendations that improved projected rewards value by 20–35% and identified \$200–\$600+ in potential annual gains per user.

ORGANIZATIONS

- Director of Professional Development | Kappa Theta Pi

2026 - Present

 - Led professional development initiatives for a 60-member organization by organizing workshops, recruiter events, and career prep sessions, increasing member engagement and internship/job placement opportunities
- Vice President | Women in Computing

2026 - Present

 - Coordinated hands-on technical workshops and networking events for Women in Computing, increasing member participation and creating opportunities for skill development, mentorship, and industry engagement.
