EDUCATION

University of South Carolina Molinaroli College of Engineering and Computing Columbia, SC
Major in Integrated Information Technology **May 2026**

- **Minor:** Business Administration, Computer Science
- **Cumulative GPA:** 4.0
- **Awards:** President's Honor List (4 semesters), Palmetto Fellows, Carolina Top Scholar

SKILLS

- **Programming Languages:** Python, C, HTML, CSS, JavaScript/TypeScript, Swift (MVVM and TCA)
- **Software Applications:** CVAT Annotation Tool, DeviceWISE, Xcode, PyCharm, WebStorm, Microsoft Suite (Excel, Word, PowerPoint, Teams)
- **Operating Systems:** Windows, MacOS, Linux
- **Hardware:** Siemens Tensorbox, Verizon 5G Private Network in a Box, Boston Dynamics Spot, Arduino, Raspberry Pi, Nvidia Jetson

RELATED EXPERIENCE

Scout Motors Columbia, SC
AI in Production Intern **May 2025-Present**

- Build computer vision models for defect detection to improve quality control in production.
- Integrate a Boston Dynamics Spot robot into automated inspection workflows.
- Collaborate with teams to design scalable AI pipelines and present results to stakeholders.

Telit Cinterion Remote
Software Developer Intern **July 2024-Present**

- Develop C-based drivers for the DeviceWISE platform, ensuring seamless hardware integration.
- Collaborate with clients and teams to gather requirements, troubleshoot, and refine driver solutions.
- Work remotely to discuss code changes, project updates, and company initiatives.

University of South Carolina Center for Industry Solutions Columbia, SC
Senior Engineer **June 2023-Present**

- Lead a team of interns on projects involving computer vision, robotics, generative AI, and iOS app development, collaborating with industry partners like Westinghouse, Kion, and Siemens.
- Implement Python-based solutions for computer vision tasks, integrate robotic systems like Yaskawa and Boston Dynamics Spot, and assist interns in learning essential tools and workflows.
- Deliver presentations to industry partners and visitors, showcasing innovative projects and fostering collaboration between students and companies.

University of South Carolina McNAIR Aerospace Center Columbia, SC
Research Intern **June 2022-August 2022**

- Interacted with researchers to develop and implement custom software solutions while working alongside industrial-grade robots.
- Performed maintenance and reprogramming of robotic systems, ensuring smooth lab operations.
- Attended regular meetings to discuss project progress, troubleshoot issues, and contribute to research.

PROJECTS

Autonomous Quality Control with Spot | Proof-of-Concept

Summer 2023

- Designed and implemented an autonomous quality control system using Boston Dynamics Spot and DeviceWISE to perform seamless factory floor inspections.
- Integrated Spot's Core IO with DeviceWISE VI, enabling real-time inferencing, data parsing, and IBM Maximo Work Order creation.
- Established a wireless monitoring solution, displaying inspection results on iPads or any connected device via Spot's internal access point.

Siemens Edge Device Inspect

Summer 2022

- Created an automated visual inspection system using IBM's portable inspection app on an iPhone to verify assembly accuracy in a simulated manufacturing process.
- Incorporated Yaskawa robots to inspect 3D-printed trays and determine whether the process should continue or stop based on inspection results.
- Enacted a real-time monitoring dashboard on a Siemens Edge Device, displaying captured images, metadata, and inspection flowcharts.

COVID Calendar/Virus Tracking Calendar

Spring 2020

- Constructed a cross-platform app for iOS and Android to help families track symptoms and manage quarantine periods based on CDC guidelines.
- Implemented family-wide monitoring features, allowing users to log symptoms and adjust isolation timelines as needed.
- Published the Android version on the Google Play Store under the name Virus Tracking Calendar due to app store restrictions.

EXTRACURRICULAR ACTIVITIES

Pickleball Club – Member

September 2024-Present

- Participate in regular pickleball practices and intercollegiate tournaments.

Kappa Theta Pi – Director of Technical Development

March 2025-Present

- Lead React/Next.js workshops to train pledges in building modern, responsive websites.
- Standardize the organization's tech stack to streamline nonprofit web development projects.
- Mentor students through code reviews and guided teams in delivering client-ready websites.

OTHER WORK EXPERIENCE

SC Competes

Columbia, SC

Volunteer

January 2020-Present

- Program and operate Boston Dynamics Spot robot to perform interactive demonstrations that spark K–12 student interest in STEM.
- Plan and deliver engaging STEM presentations in schools, showcasing robotics applications to inspire student curiosity and career exploration.
- Represent SC Competes at industry events including SC Decoded and Fall Summit, presenting robotics demonstrations and sharing technical insights with diverse audiences.
