EDUCATION

University of South Carolina, Molinaroli College of Engineering and Computing **Columbia, SC**
B.S. – Bachelor of Science, Integrated Information Technology *December 2027*
Major: Integrated Information Technology **Minors:** Cybersecurity Operations, Business Administration **GPA:** 3.87/4.0
Relevant Courses: Cybersecurity Operations, Programming Design and Development, Networking 1 & 2 (Center for Advanced Technical Studies), Cyber Security Fundamentals + Advanced Cyber Security (Center for Advanced Technical Studies), Software Design, Introduction to Networking
Organizations: Kappa Theta Pi Professional Technology Fraternity, Center for Industry Solutions Fellowship Program

CERTIFICATIONS

CompTIA A+
NVIDIA Getting Started with Deep Learning
Cisco CCNA (*In Progress*)

EXPERIENCE

South Carolina First Steps **Columbia, SC**
IT Support Specialist Intern *April 2025 - present*

- Responsible for providing **technical support, troubleshooting computer systems**, and offering help desk support.
- Overhauled the **asset management** database. Updated incorrect or out-of-date information while simplifying the data being tracked. Integrated automations to improve workflow and efficiency when managing the database.
- Managed **laptop imaging**, deployment, and wiping for **~80 employees**. Performed OS imaging using **Dell IA**, installing necessary drivers + software, adding machines into **Active Directory**, updating group policy, and assigning users in AD.

PROJECTS

Capturing Packets Using Wireshark

- Installed and configured **Wireshark** on **Ubuntu Linux** to securely capture and analyze network traffic.
- Used advanced display filters (tcp.port, tls.handshake, ip.addr) to isolate HTTP/HTTPS flows and **TLS handshakes**.
- Analyzed packet details like protocols, ports, and connection handshakes to verify destination IPs for websites.
- Expanded proficiency in **networking protocols, traffic analysis, & cybersecurity** through hands-on packet capture.

Home Network Setup with VLAN + ROAS Configuration

- Configured a home network with **VLANs, trunking, and router-on-a-stick** to improve security + connectivity.
- Troubleshooted and resolved communication issues by analyzing device configurations and link connectivity.
- Planned and validated the design using an IP addressing table and Cisco Packet Tracer, reinforcing structured problem-solving and documentation.
- Built the network for scalability, supporting future device expansion and enterprise-style configurations.

SC Economics Donation Processing Platform

- Worked in a 5-person team of students to develop customer and admin facing donation-tracking platform processing \$10,000+ of payments for nonprofit partner using **TypeScript, React, TailwindCSS**, and **Scrum** methodology.
- Developed the customer facing front end and connected donation settings with backend database allowing editing of default donation settings.
- Managed tickets in Jira, attended meetings with client, and curated a list of features aligning with client goals.

SKILLS AND TECHNOLOGIES

Programming + Command Lines: Basic Windows CLI, Basic Linux CLI, Cisco IOS, Python
IT/Network Management: Asset Management, Active Directory, Mobile Device Management (Mosyle), Computer Imaging, Wireshark, Cisco Networking, Network Protocols, Network Troubleshooting, VLANs, IP Addressing, Subnetting, Inter-VLAN Routing
Miscellaneous Skills: Hardware/Software Troubleshooting, Microsoft Office Suite, Jira, Scrum
