EDUCATION

B.S. Computer Science | University of South Carolina - Honors College | GPA: 3.87/4.0

Minors in Data Science and Information Technology, Digital Studies Certificate

Graduation: May 2026

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (React, Node.js), SQL, C++, MATLAB, R

Areas: Object-Oriented Programming, Machine Learning, Statistical Modeling, Multivariate Analytics

Web & Application Development: Front-End Development, Back-End Development, REST APIs, Web Development

Tools & Systems: UNIX, Agile/Scrum, Git/GitHub, CI/CD Pipelines, Docker, Tableau, Hadoop, SQLite, PostgreSQL

RELEVANT EXPERIENCE

Software Engineering Intern, BlueCross BlueShield South Carolina, Columbia, SC. May 2025 – Aug 2025

- Automated and designed CI/CD pipelines using **Python, Ansible, and GitHub Actions**, reducing manual Splunk server deployment time **by 90%**
- Collaborated with a five-person Agile DevOps team to treat issues, manage cross-team communication, and create project deliverables across weekly sprint cycles
- Supported change management by creating rollback procedures and system dependencies
- Authored clear, reusable documentation to ensure maintainability of the pipeline beyond the internship period

MATLAB Student Ambassador, MathWorks, Columbia, SC. Sept 2023 – Present

- Led 14+ technical workshops on machine learning, data preprocessing, data visualization, and deep learning
- Demonstrated strong written and oral communication skills in customer-facing technical settings
- Provided direct peer support, translating complex technical concepts for diverse audiences

Research Assistant, Oak Ridge Innovation Institute, Knoxville, TN. May 2024 – Aug 2024

- Built and optimized machine learning models (Random Forest, regression) to analyze CO₂ adsorption efficiency
- Processed and analyzed datasets, evaluating model performance and tradeoffs

Resident Assistant, USC Housing, Columbia, SC. Aug 2023 – Present

- Mentored students with intentional support, earning a **100% positive impact rating** from my 28 residents (2025)
- Coordinated logistics for 40+ events through scheduling, budgeting, and marketing to residents
- Collaborated with a 17-member team to document critical incidents with clear, structured reporting

CURRENT PROJECTS

StockSense – AI Stock Decisions, Senior Capstone Aug 2025 – Present

- Building a full-stack, production-style web application using **Python, FastAPI, React, PostgreSQL, and Docker**
- Designed RESTful, API-first services with secure authentication, token-based authorization, and schema validation
- Integrated FinBERT-based sentiment analysis to enrich stock analytics with real-time news signals
- Containerized services to support scalable local and cloud-ready deployment

Lego Minifigure Diversity Visualization Dashboard, Data Visualization Class Nov 2025 – Present

- Building a complete data pipeline processing 80,000+ records from Rebrickable using SQLite and R; performing data cleaning and trend analysis
- Creating an HTML/JavaScript dashboard integrating Tableau visualizations to display representation metrics

Website Development Project Manager, Wheels Harbison Area Transit Nonprofit Aug 2025 – Nov 2025

- Co-led a 5-person Agile Scrum team to design and deploy a React-based website and donation platform
- Conducted stakeholder interviews, translated business needs into technical requirements, and prioritized features
- Delivered a nonprofit customer-facing product reaching **2,500+ users**, emphasizing accessibility and usability

OTHER

President, Women in Computing, Columbia, SC. Sept 2022 – Present

Chapter Cofounder, Kappa Theta Pi (Professional Technology Fraternity), Columbia, SC. Mar 2025 – Present
