EDUCATION

University of South Carolina | School of Engineering and Computing Columbia, SC USA

DEC 2026

Majors: Information Technology

Certifications

- CCNA
- Azure-104 (in-progress)

INTERNSHIP EXPERIENCE

IT Intern | City of Columbia Government , Columbia, SC USA June 2024 – August 2024

- Managed Active Directory accounts and domain-joined devices to streamline user access and system security.
- Supported SD-WAN and Cisco Meraki solutions, gaining exposure to enterprise-level cloud networking.
- Assisted with network troubleshooting of IP addressing, VLANs, and subnets, restoring connectivity across city systems.

PROFESSIONAL EXPERIENCE

IT Help Desk Technician Assistant | City of Columbia Government Columbia, SC USA August 2024 – Present

- Delivered Tier 2 support for desktops, laptops, and docking stations, leveraging PowerShell scripting to automate troubleshooting, resolving recurring issues efficiently for over 2,000 users, and assisting technicians with completing their work orders. Strategized to provide necessary items for over 3,000 press members for the 2022 Detroit Auto Show.
- Supported police vehicles and Axon software by diagnosing mobile IT systems and application issues, ensuring operational reliability for over 1,000 police officers
- Assisted with network troubleshooting of IP addressing, VLANs, and subnets, restoring connectivity across city systems.

Projects

Ansible Playbooks |

- Utilized Ansible for network automation of Cisco Layer 2 and layer 3 switches and also cisco routers
- Set up inventory files to push configurations over SSH to the IP address of each switch or router to keep a consistent configuration
- Utilized Linux scripts to copy the information from Ansible to help confirm that the configuration has succeeded and run CRON scripts to routinely grab configurations

Azure Terraform Deployments|

- Cloud Networking & Infrastructure as Code
- Utilized Terraform to set up a development environment involving deploying VNets, Resource Groups, and utilizing AzureRM.
- Building an understanding of Terraform and Azure services was critical in this project

CCNA Home labs |

- Enterprise network setup with cisco products for CCNA studying
- Built Network topologies and design methods such as router-on-a-stick, Inter-Vlan routing, Core – Access layer, and Port security.
- Configuring utilizing Netmiko, Ansible, Linux, or the Cisco IOS command CLI

Kappa Theta Pi |

- Built a Professional website for Kappa Theta Pi at the University of South Carolina
- For the frontend, my group utilized Tailwinds, React, and Next.js
- For the backend, we utilized Verel for our database and JavaScript to form connects to google drive and our form for storage

IT SKILLS

- **Core Networking:** Cisco Routers & Switches
- **Cloud:** Microsoft Azure, Terraform, CDK/SDK
- **Automation & Scripting:** Python, Ansible, Linux, PowerShell, GitHub, Jira
- **Security & Systems:** Active Directory and Office 365
- **Technical Support:** Hardware/Software Diagnostics, Tier 1/2 IT Support
- **Web-Development:** Tailwinds, Next.js, JavaScript, Vercel, and CSS
