EDUCATION

University of South Carolina

Columbia, SC

Bachelor of Science in Computer Science, Minor in Business Administration — GPA: 3.6/4.0

- Relevant Coursework: Data Structures and Algorithmic Design II, UNIX/Linux Fundamentals

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, SQL (PostgreSQL), HTML, CSS

Tools & Technologies: Git, GitHub, React, Next.js, Supabase, Prisma ORM, PostgreSQL, Jira, Linux/UNIX Environments, Vercel

Concepts: Object-Oriented Programming, Full-Stack Development, Debugging & Testing, Relational Databases, Documentation, Version Control, Agile Collaboration, Problem Solving

PROJECTS

MealMate | *Next.js, TypeScript, Supabase, Google OAuth, Vercel* | mealmate-usc.com

2025

- Built and deployed a solo full-stack web application in 2–3 months that helps University of South Carolina students track weekly retail swipe usage and review 30-day transaction history
- Implemented Google OAuth authentication and a Supabase/PostgreSQL backend across 7 database tables to securely store and display 61 logged swipe records
- Designed a streamlined 2-page interface with 3 core features: authentication, a weekly swipe dashboard, and a 30-day history view for transaction tracking
- Tested and debugged end-to-end user flows across sign-in, dashboard, and history views to improve reliability, usability, and data consistency in a live production app

Salon Booking Application | *Next.js, TypeScript, PostgreSQL*

In Progress

- Architecting a solo full-stack scheduling application intended for an initial deployment serving 100+ customers, with expansion potential to support 1,000+ customers across multiple providers
- Defined 6 core product features, including booking, calendar management, admin dashboard, customer profiles, service management, and provider schedule/time-off controls
- Reworking the project from the ground up after 4 months of iterative development to apply stronger Next.js architecture, improve maintainability, and better support long-term scalability

EXPERIENCE

Hidden Glen Golf Club

April 2023 – Present

Bag Room Attendant (Seasonal)

Cedarburg, WI

- Supported daily operations for a high-volume private club serving 100+ members and guests, maintaining dependable service in a fast-paced environment
- Prepared 100–300 golf bags and 50+ carts per day to ensure equipment readiness and smooth day-to-day operations
- Worked 40+ hours per week during peak seasons and built a reputation as a trusted lead worker across 4 summers of seasonal employment
- Trained 15+ new employees and coordinated with teams of 1–4 coworkers per shift, resolving new service needs at least every 10 minutes

INVOLVEMENT

Kappa Theta Pi – Professional Technology Fraternity

Jan 2025 – Present

Member

University of South Carolina

- Collaborated on a 5-person team to complete the codebase for the fraternity's first technical project, contributing 5 completed Jira tickets with associated code deliverables
- Participated in weekly team meetings and Agile workflows while attending 2 recurring weekly workshops focused on technical and professional development
- Prepared and delivered a project presentation for the KTP Symposium, strengthening technical communication, teamwork, and project documentation skills
