EDUCATION

University of South Carolina

Bachelor of Science in Computer Science, Concentration in Cyber Security

Columbia, SC

Aug. 2023 – May 2027

RELEVANT COURSEWORK

CSCE 548 – Building Secure Software | CSCE 247 – Software Engineering | CSCE 212 – Digital Logic Design | CSCE 350 – Data Structures and Algorithms

EXPERIENCE

Chief Marketing Officer

March 2026 - Present

Inspire Columbia

Columbia, SC

- Lead branding and graphic design efforts for live shows and events, creating cohesive visual identities and marketing materials
- Oversee marketing strategy and creative direction to build brand presence for Inspire Columbia productions

General Manager

February 2024 – Present

Carolina Bar Group LLC

Columbia, SC

- Managed staff payroll, scheduling, and vendor coordination while balancing efficiency and labor costs
- Oversaw all computer systems within the bar, ensuring continued operational uptime

Technical Producer

January 2026 – Present

Changemakers — TEDxCongaree Vista

Columbia, SC

- Design graphic assets, stage layouts, and speaker decks for live events and marketing
- Coordinate production vendors for quotes, pricing, and equipment rentals; provide on-site A/V support

Team Leader

April 2021 – September 2023

Chick-Fil-A

Fort Mill, SC

- Led shift operations, maintained cleanliness standards, and achieved top scores on all health and corporate inspections
- Trained and supported team members to uphold service, safety, and operational standards

PROJECTS

VulnVault | *Python, FastAPI, PostgreSQL, Next.js, TypeScript Vercel · Railway · REST API* January 2026 – Present

- Built a full-stack four-tier web application for tracking software vulnerabilities, affected products, vendors, and security reports, deployed on Railway (backend) and Vercel (frontend)
- Designed and implemented a layered Python backend — Data Access Layer (psycpg2), Business Logic Layer, and a RESTful Service Layer (FastAPI) — with 20 endpoints supporting full CRUD operations across four relational entities
- Engineered a normalized PostgreSQL schema with referential integrity constraints, check constraints on severity/status enums, and indexed foreign keys; seeded with 150+ rows of realistic test data
- Developed a responsive Next.js/React/TypeScript frontend with a custom dark-mode design system, featuring live search, multi-filter support, modal forms, and a real-time dashboard with severity and status breakdowns

PolPadAI | *Next.js, React, TypeScript, Tailwind CSS Vercel*

January 2026 – Present

- Implemented cookie-based session authentication with HMAC-SHA256 signature verification and server-side route protection via Next.js layout guards
- Built a two-tier RBAC system with admin and user roles, gating all mutations behind server-validated session checks that return 403 before any business logic executes
- Developed a user management dashboard for account creation/removal and a multi-category photo submission workflow for structured field data collection

TECHNICAL SKILLS

Languages: Java, Python, C/C++, HTML/CSS

Frameworks: React, Node.js

Developer Tools: Git, VS Code, Visual Studio, Jira
